

Electrical & Hardware POS

Smart Cloud Billing, Inventory & Business Management System

A purpose-built, high-speed Point of Sale and ERP software engineered specifically for retail and wholesale Electrical, Hardware, Plumbing, and Sanitaryware businesses. Simplifies counter sales, prevents stock loss, and accelerates cash flow.

1. Target Industries & Shop Types

Engineered to handle complex multi-variant hardware and electrical items out-of-the-box

Electrical Retail & Wholesale

Wires, switches, MCBs, lighting, conduits, fans, cables & electrical fittings with meter/roll units.

Hardware & Tools Stores

Power tools, fasteners, screws, bolts, paints, building materials, abrasives & hand tools.

Plumbing & Sanitaryware

PVC / CPVC / UPVC pipes, multi-size fittings, taps, valves, water tanks & sanitary accessories.

Multi-Category Traders

Hybrid stores managing both retail walk-ins and contractor wholesale bulk orders on credit.

2. Overcoming Traditional Shop Challenges

Direct comparison: Manual Paper Billing vs. Electrical & Hardware POS System

Operational Area	Traditional Manual Bill Book / Generic Method	Electrical & Hardware POS Solution
Billing Speed & Checkout	Slow manual handwriting; customer waits 5-10 mins per bill during rush hours.	3-second instant product search, auto-rates, barcode lookup, instant thermal/A4 print.
Pricing & Size Variations	Staff confused by hundreds of pipe & wire sizes (e.g. 20mm, 25mm, Class 1-3).	Pre-loaded multi-variant catalog with pre-set wholesale & retail price lists.
Calculation Errors	Handwritten math mistakes in totals, manual discounts, and tax percentages.	100% automated calculations, line item discounts, auto-round-off, and zero error.
Payment Collections	Manual tracking of cash; uncollected credit balances slip through the cracks.	Dynamic UPI QR on bills for instant scan & pay; transparent customer credit records.
GST & Tax Accounting	Messy bill books handed to CA at month end; severe delay in filing returns.	1-Click GSTR-1, GSTR-3B, HSN-wise tax reports ready for immediate CA submission.
Internet Dependencies	Traditional cloud apps stop working entirely during network outages.	Hybrid offline resilience: works offline seamlessly and auto-syncs when online.

3. Core System Modules & How They Work

In-depth breakdown of features designed for everyday hardware store operations

MODULE 01

High-Speed POS & Billing Engine

Designed for high counter traffic with lightning-fast search, item additions, and multi-format printing.

- GST & Non-GST Modes:** Toggle between formal GST Tax Invoices and Non-GST / Estimate bills in a single click.
- Bilingual Receipts (Tamil + English):** Prints item names, terms, and headers in both English and Tamil for regional clarity.
- 1-Click WhatsApp Invoice Dispatch:** Directly sends formatted PDF/digital bills to customer WhatsApp without saving numbers.

- Dual Printing Modes:** Supports both standard A4 multi-page invoices and ultra-fast 2-inch / 3-inch Thermal POS receipts.
- Dynamic UPI QR Code on Bill:** Generates real-time UPI QR code (GPay, PhonePe, Paytm) matching exact bill total for instant tap & pay.
- Flexible Discounts & Round-Off:** Apply item-wise percentage/fixed discounts or overall bill concessions with automated rupee round-off.

MODULE 02

Quotations & Contractor Estimates

- Contractor & Site Estimates** - Generate detailed itemized quotes with custom site location, client GSTIN, and validity periods.
- WhatsApp & PDF Export** - Share clean, branded PDF estimates with builders and electricians immediately upon request.

- 1-Click Invoice Conversion** - Instantly convert approved quotations into live billing invoices without re-entering a single item.
- Quotation Sequence & Tracking** - Maintains independent sequence numbering (QUO-) and historical quotation repository.

MODULE 03

Pre-Loaded Catalog & Inventory Master

- Pre-Configured Item Database** - Comes ready with hardware, pipes (Leo Plast, ISI), electrical wires, fittings, switches, and valves.
- Bulk Excel Import & Export** - Upload entire supplier price lists via Excel in seconds. Export inventory for stock auditing.
- Catalog Deduplication Tool** - Built-in intelligent cleaner removes duplicate entries and merges variant pricing automatically.

- Multi-Size Variant Engine** - Handles 10+ size variants per product (e.g. 20mm, 25mm, 32mm, 40mm) under a single master card.
- Low-Stock Radar & Alerts** - Automated warnings when high-velocity items drop below threshold (< 15 units) to avoid stockouts.
- Unit Flexibility** - Full support for Numbers (Nos), Meters (Mtr), Bundles, Boxes, Kilograms (Kg), and Sets.

ZERO LEARNING CURVE:

Any shop assistant or cashier can master complete billing in less than 10 minutes without accounting knowledge.

4. Intelligence, Compliance & Mobility

Real-time analytics, tax compliance, and mobile operations for shop owners

MODULE 04

360° Real-Time Business Dashboard

Live Revenue & Profit Tracking

Instant visibility into daily, weekly, and monthly sales turnover and estimated gross margins.

Top-Selling Items Ranking

Identifies top 5 fast-moving items to ensure optimal capital allocation and bulk purchasing.

Category Sales Distribution

Visual percentage split between Electrical vs. Plumbing vs. Hardware product revenue.

Payment Channel Breakdown

Detailed split across Cash, UPI (GPay/PhonePe), and Credit ledger transactions.

MODULE 05

1-Click GST & Tax Compliance Engine

GSTR-1 Ready Summaries

Automated B2B invoices with customer GSTIN, B2C small retail sales, and credit notes.

HSN-Wise Sales Breakdown

Detailed table of HSN codes with quantity, total value, tax rate, and computed tax liability.

GSTR-3B Tax Liability Breakdown

Aggregated figures for Outward Taxable Supplies, Total Taxable Value, CGST, SGST, and IGST.

Excel & CSV Export for CAs

Generates clean spreadsheets ready to send straight to your tax accountant or CA without manual data entry.

MODULE 06

Mobile Portal (/mobile)

- Full mobile web app for shop floor staff.
- Instant price check and stock lookup while walking aisles with customers.
- Create quotes & bills directly on smartphones.
- Optimized for touch screens & mobile browsers.

MODULE 07

Cloud Sync & Offline Reliability

- Built on real-time cloud database architecture.
- Offline failover: billing never halts during broadband or 4G disconnects.
- Auto-syncs local sales to cloud when reconnected.
- Automated daily backup ensures data is never lost.

5. End-User Affordability & Direct Business Benefits

Tangible financial and operational gains that shop owners receive from Day 1

100% Hardware-Agnostic & Extremely Affordable

Unlike outdated legacy POS systems that demand expensive proprietary POS terminals, touch cash registers, and annual maintenance contracts, this system runs smoothly on ANY existing desktop PC, laptop, Android tablet, or smartphone with standard printers.

01 TIME SAVINGS

80% Faster Billing & Queue Elimination

Instant keyword search, pre-set prices, and automated tax calculations reduce checkout time from 5 minutes down to 30 seconds per customer. Zero customer walkaways during evening rush hours.

02 FINANCIAL ACCURACY

Zero Math Mistakes & Revenue Leakage

Eliminates handwritten pricing miscalculations, incorrect discounts, and missed items. Every rupee is accounted for accurately with automated round-off and item-level price controls.

03 CASH FLOW ACCELERATION

Faster Cash Flow & Instant UPI Payments

Dynamic UPI QR codes printed directly on customer bills encourage instant digital payments via GPay, PhonePe, and Paytm, significantly slashing delayed customer credits and bad debt.

04 WORKING CAPITAL OPTIMIZATION

Eliminate Stockouts & Dead Inventory

Real-time stock alerts (<15 units) warn owners before popular pipe sizes or electrical cables run out. Top-selling item analytics ensure you only invest capital in fast-moving inventory.

05 COMPLIANCE PEACE OF MIND

Zero-Stress GST Filing & CA Coordination

Saves 15+ hours every month of manual bill entry. Export GSTR-1, GSTR-3B, and HSN-wise summaries directly into Excel and send to your CA with zero filing penalties or errors.

06 BUSINESS CONTINUITY

Offline Billing Resilience & Total Security

Never lose a sale during internet outages. Local caching keeps billing active, automatically syncing to the cloud when connection returns. Complete backup protects against hardware failure.

Summary of Quantifiable Return on Investment (ROI) for Shop Owners:

- **Billing Time:** Reduced from ~5 mins to 30 secs per bill (80% faster checkout).
- **Accounting Effort:** Saves 15+ hours/month in manual ledger reconciliation and tax tallying.
- **Hardware Cost:** 10 additional hardware needed; runs on existing PC/laptop/phone.
- **Revenue Leakage:** Eliminates 100% of manual calculation and unrecorded credit losses.
